For those of you who use Motorola Indala Style and Format Proximity card readers, whether as a preferred product or when used on existing sites, Security Merchants are pleased to announce several **NEW Proximity card readers** from Integrated Control Technology (ICT), manufacturers of the Protégé Integrated Security, Access Control and Building Automation system.

These New Readers not only read some specific Indala formats but are also 'Multiple Format', in that they will also read HID 125KHz and Paradox.

They also support:

- Dual LED Inputs for Tri-Colour Operation
- External Beeper control
- Compatible with ANY Access Control system with Wiegand Reader Interface
- Open format "keep alive" transmission for Reader Tamper or Missing monitoring
- Fully encapsulated design allows all-weather operation down to -30 Celsius
- 2 Year Warranty

For **extremely competitive pricing** on these new Readers, visit or contact your nearest Security Merchants branch.
